

A Menu of Favorite WordPerfect Characters
WordPerfect Magazine
Tips

I created the included FAVECHAR.WPM macro to quickly insert my favorite characters from the WP character sets.

To play the macro, press Play Macro (Alt+F10), type "favechar" and press (Enter). From the menu at the bottom of the screen (see figure below), choose the desired character and press (Enter). The macro inserts the character for you.

A Section; B Paragraph; C Trademark; D EmDash

To add/delete/change your favorite characters, go into the Macro Editor – press (Ctrl-F10), type "favechar" and press 2 – and modify the macro in the highlighted lines below. Use the Compose feature (Ctrl-2) to add the individual characters.
