

Directory Sorting Macros
By Chris Scott

The included macros are:

- DIRSORT.WPM: A menu of mode and sort options that works only in List Files (see figure below). You can make it into an Alt-letter macro or nest it in a keyboard layout (WPK file) or both.
- F5.WPM - Copy/retrieve this macro to a keyboard layout (WPK file) to redefine F5 to access DIRSORT.

The menu does not have all options given by List Files, but options are easy to add. The menu is easy.

Important: DIRSORT.WPM works only in List Files (F5).

MODE :	SORT BY:
1 Short name	D Date
2 Long name	E Extension
	N Name
	S Size
hit F1 to cancel
