

# Display a Popup Calendar

## WordPerfect Magazine

### Bonus Macros

The included POPCAL.WPM macro displays a popup calendar on your screen any time you run the macro, whether you have a document on-screen or not.

To use this macro, press Macro (Alt-F10), type *popcal* and press (Enter). The current month automatically appears in a box with options at the bottom (see figure below).

To use the options, choose from the letters and arrows which appear in bold. For instance, by pressing (Up Arrow) or the letter "P," you can scroll backwards through the year, month by month. Using (Down Arrow) or the letter "N" allows you to scroll forward through the year. If you want to go directly to a specific month and year, press "C" for Change Month and follow the prompts. When you wish to return to your document screen, simply press "Q" to quit.

APRIL							2025
SU	MO	TU	WE	TH	FR	SA	
		1	2	3	4	5	
6	7	8	9	10	11	12	
13	14	15	16	17	18	19
