

Exit to the Document Screen  
WordPerfect Magazine  
Tips

Returning to WordPerfect's document screen from a menu several layers deep can be a guessing game as to how many times you must press Exit (F7). I created a macro that returns you to your document screen from any screen in WordPerfect, including the Help screen. For this to work in all screens, you must assign the macro to an (Alt-letter) macro or map it to an unused key.

The macro is included as ALTE.WPM. To run it, press (Alt-E) at any screen and the macro exits to the document screen.
