

Set a Tab at the Cursor  
WordPerfect Magazine  
Macro Challenge

The included TABSET.WPM macro sets a tab at the current cursor position.

To use the macro, place your cursor where you want to set a tab and press Macro (Alt-F10), type *tabset* and press (Enter). At the prompt Delete existing tab stops? No (Yes), press (N) No if you want to keep your current tab settings and just add a tab setting. Or press (Y) Yes to delete the previous tab setting and set a single tab.
