

Three Quick Macros  
WordPerfect Magazine  
By Judy Housman

The three included macros have been copied from a keyboard used by a particular law firm. They are:

- LINE2RT.WPM: Draws a solid horizontal line from the cursor position to the right margin. *Note: This will not show on your monitor. It can only be seen in View Document (Shift-F7, 6).*
- PRINTPG.WPM: Prints the page the cursor is on. *Note: This will not work if the document needs to be generated for tables of contents, etc. If your computer beeps or your printer does not print, go into Control Printer (Shift-F7, 4) and check the Action (this will tell you why your printer is not printing).*
- SPELLPG.WPM: Spell checks the page the cursor is on.
