

A Menu of Favorite WordPerfect Characters
WordPerfect Magazine
Tips

I created the included FAVECHAR.WPM macro to quickly insert my favorite characters from the WP character sets.

To play the macro, press Play Macro (Alt+F10), type "favechar" and press (Enter). From the menu (see figure below), choose the desired character and press (Enter). The macro inserts the character for you.

To add/delete/change your favorite characters, go into the Macro Editor – (Ctrl-F10), type "favechar" and press E – and modify the macro in the highlighted lines below. Use the Compose feature (Ctrl-2) to add the individual characters.

– Dan Holstein, New York, NY
